- Submission of registrant data to MOCA at least 10 days prior to workshop
- Signed **MOCA Workshop Waiver** forms for all participants prior to workshop
- Toilet facilities
- Signage

WORKSHOP FAQs

- Cemetery Preservation Workshops I & II will be presented by trained MOCA participants and will involve cleaning stones and (optionally) straightening leaning TABLET stones (more than 15 degrees lean). Tablet stones have NO BASES either on top of the ground or underground. Each workshop is approximately 4 hours.
- Suggested workshop group of 20 is not geographically restricted to residents of town/county.
- Whenever possible, workshop locations should be visible from the road or very close by to allow access for participants and materials.
- Advertising will suggest a donation – payable to the host group – to be used toward the cost of supplies. [e.g. \$20 per participant]
- Participants will provide their own lunch and if possible “tools” as listed in the pre-workshop info.
